backapp

less lower back pain
less pains in the upper body
less use of pain killers

-By just sitting down!

What can Backapp do for your company?

Health check
The Backapp health check is a study with questionnaires filled in by your employees. The questionnaire contains questions about health elements, like pains in the low back, pains in the upper body, use of pain killers, fatigue, etc. while working. The results will be organized as a report to your company.

Field trial
You can try the Backapp chair and the Backapp 360 balance board in your company for 6 weeks. We follow up with questionnaires at the beginning and after 6 weeks. Minimum number of participants are 30.
Results will be reported by external partner with statistics.

Documented effects
In the field trials reported in this brochure, we have measured significant positive effects of the Backapp products on Lower back pains, Pains in the upper body, Use of pain killers and Tiredness.

ACTIVE SITTING
BALANCED LIFE
